Academic Year: 2023–2026

FARM MANAGEMENT SYSTEM

User Story:

In the Farm Management System (FMS), farmers, farm managers, and system administrators use a centralized platform developed on Salesforce to store and manage agricultural information efficiently. The purpose of this system is to keep all farm-related data such as farm details, crop information, farmer records, and buyer details in a secure and well-organized manner. Through this platform, **users can add, edit, and maintain farm information**, including farm location, size, and ownership. They can also record crop production data, such as the type of crop grown, planting and harvesting dates, and yield details. In addition, the system allows users to manage buyer transactions, including buyer information, quantity of crops sold, and payment records. The system provides an **easy-to-use interface** that helps users enter and update information quickly. It also includes **validation rules** to ensure that the data entered is correct and to avoid mistakes or incomplete records.

Another key feature of the system is the ability to generate **real-time reports and interactive dashboards**. These tools help users evaluate farm performance, track crop production, and monitor sales activities. With these insights, farmers and managers can make **better decisions based on accurate data**. Furthermore, the system uses **role-based access control and secure data storage** to protect sensitive information. Only authorized users can access specific data, which ensures privacy while allowing different users to work together effectively. Overall, the Farm Management System helps

reduce paperwork, decrease errors, improve work efficiency, and support modern, data-driven farm management practices.

1. INTRODUCTION

1.1 Project Overview :

The Farm Management System (FMS) is a Salesforce-based application designed to digitize and streamline agricultural operations. It manages data related to farms, crops, farmers, and buyers while providing real-time insights through reports and dashboards. The system helps farmers and managers monitor agricultural activities efficiently and make informed decisions.

1.2 Purpose:

The main purpose of this project is to:

- Digitize agricultural data management
- Improve data accuracy and accessibility
- Automate record handling
- Enable real-time monitoring
- Support data

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Farmer	Maintain farm and crop records	Data is often incomplete or incorrect	Records are kept manually in registers	Frustrated and confused
PS-2	Farm Manager	Monitor farm productivity and sales	Reports are delayed and inaccurate	Data is scattered across files and sheets	Stressed and inefficient
PS-3	Buyer	Access crop availability and pricing	Information is not updated regularly	There is no centralized digital system	Uncertain and dissatisfied
PS-4	System Admin	Manage user access and system security	Unauthorized access may occur	Access control is handled manually	Concerned and insecure

Problem Statements – Farm Management System

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1		Maintain farm and crop records	Data is often incomplete or incorrect	Records are kept manually in registers	
PS-2	 Farm Manager	Monitor farm productivity and sales	Reports are delayed and inaccurate	Data is scattered across files and sheets	
PS-3		Access crop availability and pricing	Information is not updated regularly	There is no centralized digital system	
PS-4	 System Admin	Manage user access and system security	Unauthorized access may occur	Access control is handled manually	

2.2 Empathy Map Canvas

Target Users:

- Farmers
- Farm Managers
- Buyers
- System Administrators

Empathy Analysis

- **Think & Feel:** Need accurate and timely farm data
- **Hear:** Feedback from agricultural officers
- **See:** Registers, paper files, spreadsheets
- **Say & Do:** Enter records manually
- **Pain:** Data loss, errors, delays
- **Gain:** Automation, fast reporting

2.3 Brainstorming

Brainstormed Ideas

- Manual farm records
- Excel-based management
- Web-based system
- Mobile farm app
- Salesforce-based FMS

Selected Idea

Salesforce-based Farm Management System.

3.REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Stages:

1. Login
2. Access Farm Management App
3. Enter Farm and Crop Data
4. Register Farmers and Buyers
5. Generate Reports
6. Analyze Results
7. Decision Making

3.2 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	User Authentication
FR-2	Farm, Crop, Farmer, Buyer Management
FR-3	Data Entry and Validation
FR-4	Relationship Mapping
FR-5	Report Generation

FR-6	Dashboard Visualization
FR-7	User Role Management

Non-Functional Requirements

NFR	Description	Example
Usability	Easy interface	Simple Lightning UI
Security	Data protection	Profiles & roles
Reliability	No data loss	Cloud backup
Performance	Fast access	Reports in <3 sec
Availability	24/7 access	Cloud hosting
Scalability	Handles growth	More farms/users

3.3 Data Flow Diagram

Data Flow:

User →Salesforce UI →Custom Objects (Farm, Crop, Farmer, Buyer) →Validation Rules →Relationships →Reports →Dashboards

3.4 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning UI
Backend	Salesforce Platform
Database	Salesforce Cloud
Automation	Validation Rules
Analytics	Reports & Dashboards

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

The FMS replaces manual farming records with automated data management. Cloud storage prevents data loss, dashboards improve analysis, and real-time reports eliminate delays. This ensures accurate and timely agricultural insights.

4.2 Proposed Solution

Functional Requirements

Parameter	Description
Problem	Manual maintenance of farm, crop, farmer, and buyer records leading to errors, data loss, and delays.

Solution	Salesforce-based Farm Management System with centralized data storage and automation.
Innovation	Automated data entry validation, cloud storage, and real-time reporting dashboards.
Impact	Improved data accuracy, faster reporting, and better decision-making for farmers and managers.es
Business Model	Digital farm management and agricultural data services platform.
Scalability	Supports multiple farms, users, and regions with cloud-based infrastructure.

4.3 Solution Architecture

Architecture Layers

1. Presentation Layer – Salesforce Lightning UI
2. Application Layer – Validation Rules, Relationships
3. Data Layer – Custom Objects
4. Analytics Layer – Reports and Dashboards

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- Created Salesforce Developer Org
- Developed custom objects
- Configured tabs and Lightning App
- Created fields and relationships
- Designed profiles and roles
- Created users and sharing rules
- Developed reports and dashboards
- Conducted testing and reviews

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	As a system administrator, I want to create and configure a Salesforce developer account so that I can set up and deploy the Farm Management System.	3	High	RIFA SADAF C
Sprint-2a	Data Modeling	USN-2	As an admin, I want to create Farm, Crop, Farmer, and Buyer objects with proper relationships so that agricultural data is stored and managed efficiently.	5	High	NAJIHA FATHEEN.A
Sprint-2	Data Modeling	USN-3	As a staff member, I want tabs and a Lightning App for all farm modules so that I can easily navigate and perform daily operations.	5	High	RUSHEEDA FAHA.R
Sprint-3	Automation	USN-4	As a system, I want to validate farm and crop details such as dates, quantities, and mandatory fields so that incorrect or incomplete records are prevented.	3	High	RIFA SADAF C
Sprint-3	Automation	USN-5	As a manager, I want automated flows for crop updates and buyer notifications so that farm operations are processed faster without manual intervention.	3	High	YAMUNA P
Sprint-4	Security	USN-6	As an administrator, I want role-based access control for farmers, managers, and buyers so that sensitive farm and transaction data is secure.	5	High	NAJIHA FATHEEN A
Sprint-5	Reports	USN-7	As a farm manager, I want reports showing crop yield, sales, and buyer transactions so that I can monitor farm performance and make informed decisions.	4	High	RUSHEEDA FAHA R
Sprint-6	Dashboards	USN-8	As a farm manager, I want dashboards showing crop productivity, sales trends, and operational statistics so that I can monitor performance visually.	4	Medium	YAMUNA P

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	2 Days	03-03-2026	04-03-2026	20	04-03-2026
Sprint-2	20	2 Days	04-03-2026	05-03-2026	20	05-03-2026
Sprint-3	20	2 Days	06-03-2026	07-03-2026	20	07-03-2026
Sprint-4	20	1 Days	07-03-2026	08-03-2026	20	08-03-2026

6. Project Development Phase:

Project Description:

The Farm Management System (FMS) in Salesforce is a comprehensive solution designed to digitize and streamline agricultural operations. This application empowers farmers, farm managers, and stakeholders by managing data related to crops, Farm, Farmer, and buyers, while providing actionable insights through reports, and dashboards.

PROJECT FLOW:

Milestone 1: Creation of developer account

Milestone 2: Object creation

Milestone 3: Tabs

Milestone 4: Lightning App

Milestone 5: Fields and Relationship

Milestone 6: Profile

Milestone 7: Role

Milestone 8: User

Milestone 9: Sharing Rules

Milestone 10: User Adoption

Milestone 11: Reports

Milestone 12: Dashboards

Milestone 13: View Report And Dashboard

Milestone 1-Salesforce:

Activity1:

Creating a Salesforce Developer Org:

A Developer org has all the features and licenses you need to get started with Salesforce.

1. Search [Developer.salesforce.com/signup](https://developer.salesforce.com/signup)
2. Enter the following details like First name, last name, Email, Role, Company, Country/Region, Postal code, and Username must be unique.
3. Click sign me up, after a few min you will reserve a mail salesforce org and by using the verify account link you can create your new password.
4. Click save.
5. Search login.salesforce.com

The screenshot shows the Salesforce Developer Edition sign-up page. The header is blue with white text: "Build enterprise-quality apps fast and get hands-on with Agentforce and Data Cloud. Sign up for your Developer Edition." Below this is a white sign-up form. The form has the title "Sign up for your Developer Edition" and a subtitle "A free Salesforce Platform environment with Agentforce and Data Cloud". It contains several input fields: "Job title", "Country/region" (a dropdown menu showing "India"), "State/province" (a dropdown menu showing "Tamil Nadu"), and "Work email" (a text field showing "rifasada2005@gmail.com"). Below these fields is a checkbox labeled "I agree to the [Main Services Agreement – Developer Services](#) and [Salesforce Program Agreement](#)". Below the checkbox is a paragraph of text: "Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure. I acknowledge, as described in the Developer Documentation: (1) the Developer Edition includes autonomous and other generative AI features; and (2) Salesforce may limit use of those features and the org, and may terminate any org that has been inactive for 45 days. We value your privacy. To learn more, visit our [Privacy Statement](#)." Below this text is a blue button labeled "Sign me up". At the bottom of the form is a small line of text: "This site is protected by reCAPTCHA and the Google [Privacy Policy](#) and [Terms of Service](#) apply." Below the form is a dark blue footer with white text. It includes a "Worldwide" link with a dropdown arrow, a "Legal" link, a "Terms of Service" link, a "Privacy Information" link, a "Responsible Disclosure" link, a "Trust" link, and a "Contact" link. Below these links are "Cookie Preferences" and "Your Privacy Choices" links. At the very bottom is a copyright notice: "© Copyright 2026 Salesforce, Inc. All rights reserved. Various trademarks held by their respective owners. Salesforce, Inc. Salesforce Tower, 415 Mission Street, 3rd Floor, San Francisco, CA 94105, United States".

6. By using username and password you can into the Salesforce org. The homepage will appear below

Milestone 2-Object:

What is an object?

Salesforce objects are database tables that permit you to store data that is specific to an organization. It consists of fields (columns) and records (rows).

In This Application We Use 4 Custom Objects:

- 1.Farm
- 2.Crop
- 3.Farmer
- 4.Buyer

Activity 1:

Create a custom object for Farm:

To create a custom object, follow these steps:

1. From setup click on object manager.
2. Click create, select custom object.

3. Fill in the label as " Farm ".
4. Fill in the plural label as " Farms".
5. Record name: Farm Name"
6. Select the data type as "Text".

← → ↺ ⚙️ orgfarm-2ee6f8eb44-dev-ed.develop.my.salesforce-setup.com/lightning/setup/ObjectManager/new 🔍 ☆ 📁 | 🌐 ⋮

Developer Edition

Setup Home Object Manager

SETUP New Custom Object

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name Example: Account Name

Date Type Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.

Optional Features

- ☒ Allow Reports
- ☐ Allow Activities
- ☒ Track Field History
- ☐ Allow in Chatter Groups
- ☐ Enable Licensing

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more.](#)

- ☒ Allow Sharing
- ☒ Allow Bulk API Access
- ☒ Allow Streaming API Access

Deployment Status

[What is this?](#)

- ☐ In Development
- ☒ Deployed

Search Status

When this setting is enabled, your users can find records of this object type when they search. [Learn more.](#)

- ☒ Allow Search

Object Creation Options (Available only when custom object is first created)

- ☒ Add Notes and Attachments related list to default page layout
- ☐ Launch New Custom Tab Wizard after saving this custom object

7. In the Optional Features section, select Allow Reports and Track Field History.
 8. In the Deployment Status section, ensure Deployed is selected.
 9. In the Search Status section, select Allow Search.
 10. In the Object Creation Options section, select Add Notes and Attachments related list to default page layout.
-
11. Leave everything else as is, and click Save.

Activity 2:

Creation of Crop object:

1. Click on the gear icon and then select Setup.
2. Click on the object manager tab just beside the home tab.
3. After the above steps, have a look on the extreme right you will find a Create Dropdown click on that and select Custom Object.
 - a. On the Custom Object Definition page, create the object as follows:
 - b. Label: Crop
 - c. Plural Label: Crops
 - d. Record Name: Crop Name
 - e. Select the data type as "Text".
 - f. Check the Allow Reports checkbox
 - g. Check the Allow Search checkbox
 - h. In the Object Creation Options section, select Add Notes and Attachments related list to default page layout
 - i. Click Save.

Activity 3:

Creation of Farmer object:

1. Click on the gear icon and then select Setup.
2. Click on the object manager tab just beside the home tab.
3. After the above steps, have a look on the extreme right you will find a Create Dropdown click on that and select Custom Object.
 - a. On the Custom Object Definition page, create the object as follows:
 - b. Label: Farmer

- c. Plural Label: Farmers
- d. Record Name: Farmer Name
- e. Select the data type as "Text".
- f. Check the Allow Reports checkbox.
- g. Check the Allow Search checkbox.
- h. In the Object Creation Options section, select Add Notes and Attachments related list to default page layout.
- i. Click Save.

Activity 4:

Creation of Buyer object:

- 1. Click on the gear icon and then select Setup.
- 2. Click on the object manager tab just beside the home tab.
- 3. After the above steps, have a look on the extreme right you will find a Create Dropdown click on that and select Custom Object.
- a. On the Custom Object Definition page, create the object as follows:
- b. Label: Buyer
- c. Plural Label: Buyers
- d. Record Name: Buyer Name
- e. Select the data type as "Text".
- f. Check the Allow Reports checkbox.
- g. Check the Allow Search checkbox.
- h. In the Object Creation Options section, select Add Notes and Attachments related list to default page layout.
- i. Click Save.

Milestone 3 -

Tab: Tab

Tabs in Salesforce help users view the information at a glance. It displays the data of objects and other web content in the application.

Activity 1:

Creation of Farm tab:

Now create a custom tab.

- 1. Click on the Home tab, enter Tabs in Quick Find and select Tabs.

SETUP Tabs

Custom Tabs

[Help for this Page](#)

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Custom Object Tabs			
Action	Label	Tab Style	Description
Edit Del	Buyers	Phone	
Edit Del	Crops	Leaf	
Edit Del	Farmers	Factory	
Edit Del	Farms	Form	

[New](#) [What Is This?](#)

Web Tabs

[New](#) [What Is This?](#)

No Web Tabs have been defined

2. Under custom object tabs, click New.

3. For Object, select Farm.

4. For Tab Style, select any icon.
5. Leave all defaults as is. Click Next, Next, and Save.

Activity 2:

Creation of Crop tab:

Now create a custom tab.

1. Click on Home tab, enter Tabs in Quick Find and select Tabs.
2. Under custom object tabs, click New.
3. For Object, select Crop.
4. For Tab Style, select any icon.
5. Leave all defaults as is. Click Next, Next, and Save.

Activity 3:

Creation of Farmer tab:

Now create a custom tab.

1. Click on the Home tab, enter Tabs in Quick Find and select Tabs.
2. Under custom object tabs, click New.
3. For Object, select Farmer.
4. For Tab Style, select any icon.
5. Leave all defaults as is. Click Next, Next, and Save.

Activity 4:

Creation of Buyer tab:

Now create a custom tab.

1. Click on Home tab, enter Tabs in Quick Find and select Tabs.
2. Under custom object tabs, click New.
3. For Object, select Buyer
4. For Tab Style, select any icon.
5. Leave all defaults as is. Click Next, Next, and Save.

Milestone 4 - Lightning App:

What is an App?

Apps in Salesforce are a group of tabs that help the application function by working together as a unit. It has a name, a logo, and a particular set of tabs. The simplest app usually has just two tabs.

Activity 1:

Create the Farm Management System app

Milestone 5 -

Fields and Relationship: What are fields?

Fields in Salesforce represent what the columns represent in relational databases. It can store data values which are required for a particular object in a record.

Activity 1:

Creation of fields for the Farm objects:

1. click the gear icon and select Setup. This launches Setup in a new tab.
2. Click the Object Manager tab next to Home.
3. Select Farm.
4. Select Fields & Relationships from the left navigation, and click New

The screenshot shows the Salesforce Setup interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. A red arrow points to the 'Object Manager' tab. The left sidebar shows the 'Fields & Relationships' menu item highlighted with a red box. The main content area displays the 'Fields & Relationships' section for the 'Farm' object. The 'New' button is highlighted with a red box. Below the table, there are tabs for 'Quick Find', 'New', 'Deleted Fields', 'Field Dependencies', and 'Set History Tracking'.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedBy	Lookup(User)		
Farm Name	Name	Text(80)		✓
Last Modified By	LastModifiedBy	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓

5. Choose Data type as a picklist, Click next

The screenshot shows the Salesforce Setup interface in a web browser. The URL bar displays: `orgfarm-2ee6f8eb44-dev-ed.develop.my.salesforce-setup.com/lightning/setup/ObjectManager/01IgL000004efWn...`. The page title is "Developer Edition". The navigation bar includes "Setup", "Home", and "Object Manager". The main content area is titled "Farm" and shows the "Fields & Relationships" section. A list of data types is displayed, with "Picklist" selected and highlighted by a red box. To the right of the list, a description for the "Picklist" data type is provided: "Allows users to select a value from a list you define." At the bottom right of the page, a "Next" button is highlighted with a red box, and a "Cancel" button is also visible.

Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.

Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.

Allows users to enter any number. Leading zeros are removed.

Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.

Allows users to enter any phone number. Automatically formats it as a phone number.

Allows users to select a value from a list you define.

Allows users to select multiple values from a list you define.

Allows users to enter any combination of letters and numbers.

Allows users to enter up to 255 characters on separate lines.

Allows users to enter up to 131,072 characters on separate lines.

Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.

Allows users to enter any combination of letters and numbers and store them in encrypted form.

Allows users to enter a local time. For example, "2:40 PM", "14:40", and "14:40:50.600" are all valid times for this field.

Allows users to enter any valid website address. When users click on the field, the URL will open in a separate browser window.

Next Cancel

6. Enter Field Label (Farm Type), and Enter Values as (Crop, Livestock, Mixed)
7. Next, Next Click Save.

The screenshot shows the Salesforce Setup interface. The browser address bar displays the URL: `orgfarm-2ee6f8eb44-dev-ed.develop.my.salesforce-setup.com/lightning/setup/ObjectManager/01lgL000004efWn...`. The page title is "Farm". The left sidebar contains a navigation menu with the following items: Details, Fields & Relationships (selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, and List View Button Layout. The main content area is titled "New Custom Field" and "Step 2. Enter the details". It shows the "Field Label" as "Farm Type" and the "Field Name" as "Farm_Type". Under the "Values" section, the option "Enter values, with each value separated by a new line" is selected. The text area below contains the values "Crop", "Livestock", and "Mixed". At the bottom, there are checkboxes for "Display values alphabetically, not in the order entered", "Use first value as default value", and "Restrict picklist to the values defined in the value set" (which is checked). The "Previous", "Next", and "Cancel" buttons are visible in the top right corner of the form area.

Now let's create the other fields following Activity1 steps 1 to 4 and we must choose the data types of the fields carefully.

- 1.Next we Create another Picklist Field,Enter field label (Soil Quality) enter values (Organic,Cover Crops,Composting)
- 2.Again we Create Picklist field,Field Label (Irrigation type), Enter Values (Sprinkler irrigation,Drip irrigation,localized irrigation)
- 3.Choose data type as a text,enter field label(Location) 4.Choose data type as text,enter field label (size)
- 5.Create a Master Detail relationship with Farmer Object.

Activity 2:

Creation of fields for the Crop objects:

- 1.Choose Data type As a text,Enter Field Label name (Crop Name),Next save. 2.Select Data type as date ,Enter Field label (Planting Date),then save .
- 3.Again we select data type as a date,Enter field labe (Harvest date),save
- 4.Next We Create Lookup relationship on crop object realted to Farm Object.
- 5.We select adata type as currency,Enter field Label (Actual Yield), Next Save it.
- 6.Select Data type as a Number,enter Field Label (Total Acres Harvested),Enter Maximum Length(20) and save.
- 7.Now We create Formula Field For That Select data Type As a Formula,Click Next.

New Custom Field

Step 1. Choose the field type

Specify the type of information that the custom field will contain.

Data Type

☐ None Selected

☐ Auto Number

☒ Formula

☐ Roll-Up Summary

☐ Lookup Relationship

☐ Master-Detail Relationship

Select one of the data types below.

A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.

- Operators & Functions

Activity 3:

Creation of fields for the Farmer objects:

1. Select Data type Phone, Enter field label (Contact Number), next Save.
2. Select Data type Picklist, Enter Field Label (State), Enter values (Telangana, Andhra Pradesh, Tamilnadu), save.
3. Choose Data type Picklist, Enter Field Label (District), Enter Values of district, next save.
4. Again select Data type as Picklist, Enter Field Label (Village), Enter Values of villages, next save.

Creation of field dependency :

1. Now create Field Dependency For District field, Open Object Manager, Choose Farmer object, select Fields & Relationships, On Right side We have Field Dependency option, select that option.
2. Click new, Select Controlling Field as State, Dependent Field As District, Click on Continue.
3. Select the appropriate Value in each column by double-clicking them.
4. For Ex. Telangana - Yadadri Bhongir.
5. Click Include Values. And it is also the same for Andhra Pradesh, Tamilnadu with its city.
6. Click Preview, then test the dependency by selecting a different State and viewing the associate Values available for Particular state.

New Field Dependency Help for this Page 📄

Create a dependent relationship that causes the values in a picklist or multi-select picklist to be dynamically filtered based on the value selected by the user in another field.

- The field that drives filtering is called the "controlling field." Standard and custom checkboxes and picklists with at least one and less than 300 values can be controlling fields.
- The field that has its values filtered is called the "dependent field." Custom picklists and multi-select picklists can be dependent fields.

Step 1. Select a controlling field and a dependent field. Click Continue when finished.

Step 2. On the following page, edit the filter rules that control the values that appear in the dependent field for each value in the controlling field.

Controlling Field	--None-- ▾	Continue	Cancel
Dependent Field	--None-- ▾	Continue	Cancel

Creation of fields for the Buyer objects:

- 1.Select Data type as a Phone,Enter a Field Label(Contact),Save.
- 2.Select Data type as an Email,Enter Field Label(Email), Next save.
- 3.Select Data type Text area,Enter Field Label(Address),Save it.
- 4.Select Data type Picklist, Field Label(Buyer Type),Enter values (Wholesale,Retail),Click Save.

Milestone 6- Profile:

What is a profile?

A profile is a group/collection of settings and permissions that define what a user can do in

salesforce. A profile controls “Object permissions, Field permissions, User permissions, Tab

settings, App settings, Apex class access, Visualforce page access, Page layouts, Record Types, Login hours & Login IP ranges.

A profile can be assigned to many users, but user can be assigned single profile at a time.

Activity 1:

Create a custom profile:

1. From setup , enter profiles in Quick Find box
2. Select profiles (Standard user).
3. Click clone.
4. For Profile, enter Sales Department.

Create a profile with the profile name as “ Farm Manager” .

6. From setup , enter profiles in Quick Find box
7. Select profiles (Standard user).
8. Click clone.

Milestone 7- Role

In Salesforce, roles are used to determine which users have access to certain data and functions within the system. They are also used to define the reporting hierarchy within an organization. Users with higher roles have greater access to data and more control over the system.

Activity-1 Creation of role

1. From the Quick find box search for the role and click on the roles option
2. select the set up roles option

The screenshot displays the Salesforce Setup interface. At the top, the browser address bar shows the URL: `orgfarm-2ee6f8eb44-dev-ed.develop.my.salesforce-setup.com/lightning/setup/Roles/home`. The Setup navigation bar includes tabs for Setup, Home, and Object Manager. A search bar labeled "Search Setup" is present. On the left sidebar, the "Roles" option is highlighted under the "Users" section. The main content area is titled "Roles" and features a "Setup Roles" button. Below this, the "Understanding Roles" section explains the purpose of roles and provides a "Sample Role Hierarchy" diagram. The diagram illustrates a hierarchy starting with "Executive Staff" (CEO, President, CFO, VP, Sales) at the top, followed by "Sales Directors" (Western, Eastern, International) and then "Sales Representatives" (Western, Eastern, International) at the bottom. Each level includes specific permissions and access restrictions. At the bottom right, the "Set Up Roles" button is highlighted, and a checkbox for "Don't show this page again" is visible.

Milestone 8-User :

What is a user?

A user is anyone who logs into Salesforce. Users are employees at your company, such as sales reps, managers, and IT specialists, who need access to the company's records. Every user in

Salesforce has a user account. The user account identifies the user, and the user account settings determine what features and records the user can access.

NOTE- As Salesforce license can only be used by 2 Users at a time in Dev Org, so If you don't find

salesforce license then deactivate a user who has salesforce license Or change the license type from Salesforce to any other.

Activity 1:

To Create a user:

1. From Setup, enter Users in the Quick Find box, then select Users.
2. Click New User.

The screenshot shows the Salesforce Setup interface for managing users. The left sidebar contains a navigation menu with 'Users' highlighted. The main content area is titled 'All Users' and includes a search bar, a 'View' dropdown set to 'All Users', and a table of existing users. A red box highlights the 'New User' button above the table.

Action	Full Name	Alias	Username	Role	Active	Profile
Edit	Chatter Expert	Chatter	chatty.00dgl00000mgvdouab.iviejh0ht26@chatter.salesforce.com		✓	Chatter Free User
Edit	EPIC_OrgFarm	OEPIE	epic.e4a24f2dd01@orgfarm.salesforce.com		✓	System Administrator
Edit	Team_Rifa	rif	rifasada2005.33f37aa9c03f@agentforce.com		✓	System Administrator
Edit	User_Integration	integ	integration@00dgl00000mgvdouab.com		✓	Analytics Cloud Integration User
Edit	User_Security	sec	insightssecurity@00dgl00000mgvdouab.com		✓	Analytics Cloud Security User

3. Enter First name as Farm and last name as Manager.
4. Enter the user's name and email address and a unique username in the form of an email address. By default, the username is the same as the email address.
5. Select the role Farm Manager.
6. Select user License as Standard Platform User.
7. Select profile(Farm Manager).
8. Click save.

Activity 2:

Create a user with a username as "Sales Department", and assign him the sales Manager profile. Follow the steps from above Activity

Milestone 9-Sharing Rules:

What are Sharing Rules?

Sharing rules help users to share records based on conditions. It is basically created for objects whose organization-wide defaults (OWD) are set to public read-only or private because sharing rules can only extend the access and not restrict it.

Types of sharing rules,

•Owner-based Sharing Rules •Criteria-based Sharing Rules

Activity 1:

Create a sharing rule

- 1) Goto Sharing Settings, which can be found under the Quick Find section.
- 2) Scroll down and find the candidate object where a sharing rule needs to be added, and then click on New to create a new sharing rule.
- 3) Add the label of the sharing rule you want to make.
- 4) Select your rule type based on the criteria.
- 5) Select the field can join immediately check field from the Crop object.
- 6) Select the Crop as equal and value is True.
- 7) And in selecting the users to share with the section select roles and in that select Farm Manager.
- 8) And in the section of select the level of access for the users give the access Read/Write.
- 9) And save the rule.

Milestone 11-Reports:

What are Reports?

A report is a list of records that meet the criteria you define. It's displayed in rows and columns, and can be filtered, grouped, or displayed in a graphical chart. Every report is stored in a folder. Folders can be public, hidden, or shared, and can be set to read-only or read/write.

Activity 1:

Create a report:

Create a report that displays rating of the account and which has type and account name.

- 1) Click on app launcher search for reports.
- 2) Click on the new report and select the category has Farmer with Farms.

Activity 2:

Create a Report using the Objects Crops, Buyers. Follow the steps from above Activity.

Milestone 12-Dashboard:

Dashboards provide more insights than reports as they combine the data from many reports and show a summarized result. Looking at many reports at a time gives the flexibility of combining the results from them quickly. Also summaries in dashboards help us decide on action plans quicker. The dashboards can contain charts, graphs and Tabular data.

Activity 1:

Create a Dashboard:

1. Click the Dashboard tab.
2. Click New Dashboard.
3. Name the dashboard Farmers with farms and click Create.
4. Click +Component.
5. Select the Farmers with Farms and click Select.
6. Select the Gauge chart and click Add.
7. Click Save and then Done.

The screenshot shows a web browser window with the URL `orgfarm-2ee6f8eb44-dev-ed.develop.lightning.force.com/one/one.app#eyJjb21wb25lbnREZWYiOiJkZXNrdG9wRG...`. A 'Save As' dialog box is open in the foreground. The dialog has a title bar with a close button (X). It contains three input fields: 'Name' (with a red border), 'Description', and 'Folder'. The 'Name' field contains the text 'Farm Management DashBoard'. The 'Folder' field contains the text 'Private Dashboards'. There are 'Cancel' and 'Create' buttons at the bottom right of the dialog.

Milestone-13: View Report and Dashboard:

Activity 1: Report

- Click on App Launcher on left side of screen.
- Search Farm Management System & click on it.
- Click on Reports Tab.
- Click on Farmers with Farms & see records

The screenshot shows a web browser displaying a Salesforce Lightning report titled "Farmers with Farms". The URL in the address bar is `orgfarm-2ee6f8eb44-dev-ed.develop.lightning.force.com/lightning/r/Report/00OgL0000008kQR7UAM/view?query...`. The interface includes a top navigation bar with a search bar and a "Developer Edition" label. Below the navigation bar, the report title "Report: Farmers with Farms" and "Farmers with Farms Report" are displayed. A "Total Records" section shows 4 records. The main table displays the following data:

☐ Farm Type ↑	☐ Farmer: Farmer Name	☐ Farm: Farm Name	☐ Size	☐ Soil Quality
☐ Crop (2)	Najjha	Najjha Farm	15	Composting
	Rifa	Rifa Farm	10	Organic
Subtotal				
☐ Livestock (1)	Rusheeda	Rusheeda	20	Cover Crops
Subtotal				
☐ Mixed (1)	Yamuna	Yamuna Farm	18	Composting
Subtotal				
Total (4)				

At the bottom of the interface, there are toggle switches for "Row Counts", "Detail Rows", "Subtotals", and "Grand Total", all of which are currently turned on.

Activity 2: Dashboard

- Click on App Launcher on left side of screen.
- Search Farm Management system & click on it.
- Click on Dashboard Tab.
- Click Farmers With farms & see records.

← → ↻ orgfarm-2ee6f8eb44-dev-ed.develop.lightning.force.com/lightning/r/Dashboard/01ZgL000005znAbUAI/view?quer... 🔍 ☆ 📁 | 🌐 ⋮

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce interface to verify system functionality. The following were tested:

- Creation of Farm, Crop, Farmer, and Buyer records
- Validation of input fields
- Relationship and dependency checks
- Profile and role access testing
- Sharing rule verification
- Report and dashboard generation

Performance testing ensured smooth system response and stability during multiple user operations.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data system
- Reduced paperwork
- Improved accuracy
- Better monitoring
- Real-time analytics

Disadvantages

- Requires internet connection
- Salesforce license dependency
- Limited offline access

9. Conclusion:

The Farm Management System successfully digitizes agricultural data management using Salesforce. It improves efficiency, reduces errors, and enables farmers and managers to make informed decisions through automation and analytics.

10. FUTURE SCOPE

- Mobile application integration
- AI-based crop prediction
- Weather data integration
- IoT sensor connectivity
- Government scheme integration
- Market price forecasting

11. APPENDIX

- Source Code: Salesforce Configuration and Metadata
- Dataset: Farm, Crop, Farmer, and Buyer Records
- Tools Used: Salesforce Developer Org

THANK YOU!!
